Subject: No to One Bay Area

Hello,

While I cannot be at the One Bay Area meeting this evening, I'm sending this email to voice my deepest displeasure with the proposed adoption of Regional Governance for the San Francisco Bay Area. The process used to promote this plan and prepare for the imposition of this scheme has been meticulously manipulated and foisted upon communities with the direct intent of bypassing the electorate and by providing only that information which supports the implementation of the treaties formed to support the goals Agenda 21 and the global to local imposition of the same. The supposed consensus on Bay Area planning was only reachable by deception worthy of the wildest and most persistent snake oil salesmen. A true consensus is built upon a foundation of truth, not slanted information weighed to determine the only possible outcome.

The issue of regional governance is not separate from the soft law of globalization because we have adopted by treaty and agreements to insure with law or the force of law, the enactment of the goals of global to local governance with regionalism as a necessary link.

I urge you to stop the adoption and implementation of One Bay Area for the sake of everyone involved. We all want workable solutions and we all recognize that it is a daunting task to recognize the best solutions for both current and future challenges. The premises on which One Bay Area and similar projects are based come not out of a convergence of wise understanding of our ecosystems and the importance of our role in maintaining the health of the planet, but out of a radically mechanistic and extremely disconnected world view that proposes severe reduction not only in our interaction with nature, but according to the "soft law" which came out of the Rio Conference, will encourage us to reduce our numbers as a species to one in seven of our current world population.

No one is saying that programs like One Bay Area are locally designed to knowingly install an Orwellian global nightmare, but look for example, at what happens to local governments as they accept funding which obligates them to comply with regional and international treaties. The voices of the people are supplanted by appointed councils, the "planners" and by the bureaucrats whose training has prepared them not to be part of a representative government by the people, but to impose a top down governance system on the people.

For those who have long wanted to supplant the rights of individuals for the sake of the population at large, for those who have falsely defined and claimed the sole voice of the environment from a mechanistic world view, for those who do not believe in private property, this is not an Orwellian nightmare but a long awaited opportunity to abolish freedom for the sake of top down social engineering. For those of us who would not be forming the global "consensus" into which the people must buy, the Orwellian global nightmare is only a hair's breadth away.

Please join me in saying NO to One Bay Area now!

Virginia Fujii
